

NORTHSTAR

"One System. Every Number. One True Answer."

Cinematic Product Launch Film — Production Screenplay

Format: Single continuous film, 8 Acts, 26 Scenes **Target Runtime:** 7:30 (450 seconds) **Intended Use:** AI video generation (Google Flow) + voice-over recording + motion design brief **Tone Reference:** Apple WWDC keynote films, Stripe Sessions, Linear launch films, OpenAI DevDay, Arc Browser introduction **Accuracy Statement:** every feature shown in Acts 1–6 is implemented and verified against the Northstar codebase (FastAPI/PostgreSQL/SQLAlchemy backend, React frontend, 17 life event handlers, live-computed recommendations, 673-test backend suite). Act 7 is explicitly and visually separated as unreleased vision work. Nothing in Act 7 is depicted as shipped.

HOW TO READ THIS DOCUMENT

Each scene contains all production fields in a fixed order: **Scene** / **Duration** / **Narration** / **Visual Description** / **Camera Direction** / **Animation** / **Background** / **Transitions** / **On-Screen Text** / **Emotional Goal** / **Sound Effects** / **Music Style**. After all 26 scenes, this document consolidates: the full Voice-Over Script, Shot List, Scene Timing Table, Animation Notes, Music Suggestions, Camera Direction Glossary, Visual Effects List, Transition List, Subtitle Script (SRT-style), and Final Runtime.

ACT 1 — THE PROBLEM

(0:00 – 1:00 · 60 seconds · 4 scenes)

SCENE 1

Duration: 0:00–0:12 (12s)

Narration:

"Somewhere right now, someone is trying to answer a simple question."

Visual Description: Pure black frame. A single soft point of white light breathes in the center of the screen — slow pulse, like a heartbeat, like a cursor blinking in an empty field. No UI, no branding yet. The light is the only thing alive in the frame.

Camera Direction: Static locked-off shot, dead center framing. No camera movement. Let the silence and the pulse do the work.

Animation: The point of light scales from 2px to 6px and back over a 2-second breathing cycle, three full cycles across the scene.

Background: Absolute black (#000000).

Transitions: Hard cut in from black (film open). Cross-dissolve out to Scene 2.

On-Screen Text: None.

Emotional Goal: Stillness. Anticipation. The feeling of a question waiting to be asked.

Sound Effects: A single low sub-bass heartbeat pulse, synced to the light's breathing rhythm. Room tone underneath — near silence.

Music Style: No score yet — only the heartbeat pulse as the seed of the eventual score's tempo.

SCENE 2

Duration: 0:12–0:30 (18s)

Narration:

"Am I actually going to be okay?' Not someday. Not in theory. Right now, with the money I actually have."

Visual Description: The point of light expands into a cluttered desktop — dozens of browser tabs, a banking app, a budgeting spreadsheet, a retirement calculator PDF, a sticky note that reads "check this later," a second monitor with three more tabs. Every window shows a different number for the same "net worth" figure. The clutter is realistic, not cartoonish — this is what an actual overwhelmed desktop looks like.

Camera Direction: Slow push-in on the desktop, starting wide (establishing the chaos) and tightening toward the three conflicting net-worth numbers, each in a different app, none of them agreeing.

Animation: Windows appear in a rapid stagger (80ms apart), each landing with a subtle drop-shadow snap. The three conflicting numbers pulse red-outline briefly to draw the eye to the contradiction.

Background: A muted, slightly desaturated desktop wallpaper — cool gray-blue, deliberately unglamorous.

Transitions: Cross-dissolve in from Scene 1's point of light (the light becomes the cursor on this desktop). Hard cut out to Scene 3.

On-Screen Text: None — let the three conflicting numbers speak for themselves.

Emotional Goal: Recognition. "I've felt exactly this."

Sound Effects: Rapid, overlapping notification chimes (bank app, calendar reminder, email ping) — deliberately grating, slightly too many, slightly too fast.

Music Style: A single tense, arrhythmic piano note repeated — no melody yet, just unresolved tension.

SCENE 3

Duration: 0:30–0:50 (20s)

Narration:

"We built an entire financial industry — and somehow left the person in the middle of it holding twelve disconnected answers to one question."

Visual Description: Overhead top-down shot of a physical desk: a laptop, a printed bank statement, a phone showing a robo-advisor app, a sticky note with a retirement age circled and question-marked, a coffee going cold. A hand enters frame, hovers between the laptop and the phone, unsure which to trust, then withdraws without touching either.

Camera Direction: Top-down (flat lay) static camera, then a slow 5-degree tilt as if the desk itself is slightly unsettled. The hand's hesitation is the focal beat — hold on it for a full second before it withdraws.

Animation: Subtle depth-of-field pulse — the phone sharpens into focus, then the laptop sharpens instead, then neither is in focus. Visual metaphor for indecision.

Background: A real wood desk texture, warm practical lighting from a desk lamp just out of frame, cold blue light from the laptop screen competing with it.

Transitions: Hard cut in from Scene 2. Slow fade to black out (2s), longer than prior transitions — this is the act's emotional low point.

On-Screen Text: None.

Emotional Goal: Quiet frustration. Not anger — fatigue. The specific tiredness of being asked to be your own financial analyst with none of the tools of one.

Sound Effects: Ambient room tone, a clock ticking faintly, the coffee cup set down with a soft ceramic clink. All notification chimes from Scene 2 have stopped — deliberate silence now.

Music Style: The tense piano note from Scene 2 resolves downward into a minor, unresolved chord and holds — like a breath not yet released.

SCENE 4

Duration: 0:50–1:00 (10s)

Narration:

"Financial life was never meant to be a spreadsheet."

Visual Description: Full black frame. White serif-adjacent text fades in, centered, understated — no logo yet.

Camera Direction: No camera — static full-bleed typography card.

Animation: Text fades in over 1.2s, holds for 6s, fades out over 1s.

Background: Absolute black.

Transitions: Fade in from Scene 3's black. Hard cut to Scene 5 (the light returns, transformed).

On-Screen Text: "FINANCIAL LIFE WAS NEVER MEANT TO BE A SPREADSHEET."

Emotional Goal: The thesis statement lands. A held breath before the

turn.

Sound Effects: Near-total silence but for a single soft low-frequency swell building underneath, unresolved.

Music Style: The minor chord from Scene 3 sustains, joined by a single held string note — the first hint of the score's actual theme, still not resolved.

ACT 2 — INTRODUCING NORTHSTAR

(1:00 – 1:45 · 45 seconds · 2 scenes)

SCENE 5

Duration: 1:00–1:20 (20s)

Narration:

"So we built one system instead. One place where every number about your life — agrees with every other number about your life."

Visual Description: From the black frame, the single point of light from Scene 1 returns — but now it doesn't just pulse. It draws outward in one continuous, confident stroke, forming the Northstar mark: a compass-point / north-star glyph, rendered in clean single-weight line work. As it completes, it very briefly becomes the actual product's navigation-rail icon before settling back into pure brand mark.

Camera Direction: Locked-off center frame, then a very slow, almost imperceptible push-in (2% scale over 20s) — this is the film's turn, so

give it quiet confidence rather than showy movement.

Animation: Line-draw animation, single continuous stroke, easing from slow to fast to slow (ease-in-out-cubic), completing at 1:14. A soft bloom pulse (300ms) confirms completion.

Background: Deep navy (Northstar's actual product background color — the film's palette shifts here from cold desaturated gray to the product's real Deep Navy Premium palette and never leaves it again).

Transitions: Hard cut in from Scene 4's black. Cross-dissolve out to Scene 6.

On-Screen Text: None during the draw — let the mark complete in silence.

Emotional Goal: Relief becoming confidence. The exhale after Act 1's held breath.

Sound Effects: A single clean tone rings out as the line-draw completes — not a jingle, a single resonant note, like a tuning fork.

Music Style: The sustained string note from Scene 4 resolves upward into a warm major chord — the score's actual theme begins here, sparse piano and strings, unhurried.

SCENE 6

Duration: 1:20–1:45 (25s)

Narration:

"This is Northstar. An AI-first financial planning platform, built on a single idea: your entire financial life should live in one honest, living system — not twelve disconnected guesses."

Visual Description: The Northstar mark settles top-left as a real product wordmark/logo lockup. Below it, the product name types on in a clean

sans-serif: "Northstar." Then a single subtitle line beneath it: "AI-First Financial Planning." The full-bleed navy background remains; nothing else competes for attention.

Camera Direction: Static, centered composition. No movement — let the typography carry the scene entirely.

Animation: Wordmark fades/slides up 8px into place (400ms). Subtitle types on character-by-character at a measured, confident pace (not a rushed typewriter effect — roughly 18 characters/second).

Background: Deep Navy Premium, Northstar's real production background, subtle almost-imperceptible gradient vignette toward the edges.

Transitions: Cross-dissolve in from Scene 5. Hard cut out to Scene 7 (Act 3 begins — the actual product UI enters for the first time).

On-Screen Text: "NORTHSTAR" / "AI-First Financial Planning."

Emotional Goal: Arrival. The audience now knows what they're watching and trusts it's confident, not hyped.

Sound Effects: Soft ambient pad swell, no percussive hits — restraint, not spectacle.

Music Style: Theme continues, now with a soft rhythmic pulse introduced underneath (a heartbeat, callback to Scene 1 — now steady and calm instead of anxious).

ACT 3 — FINANCIAL CONTEXT
→ DASHBOARD → REPORTS →
RECOMMENDATIONS → AI

(1:45 – 3:15 · 90 seconds · 5 scenes)

SCENE 7

Duration: 1:45–2:00 (15s)

Narration:

"It starts with four honest inputs. What you earn. What you spend.
What you own. What you owe."

Visual Description: Four clean icon-and-label pairs materialize in a horizontal row against the navy background: Income (an upward arrow glyph), Expenses (a downward arrow glyph), Assets (a shield/vault glyph), Liabilities (a chain-link glyph) — each rendered in the product's real UI icon style, not generic stock icons. As the narration names each one, that icon brightens and the others dim slightly, then all four converge inward toward a single central point.

Camera Direction: Wide static shot for the four-icon reveal, then a slow, deliberate camera push toward the convergence point as the icons collapse inward.

Animation: Icons fade/scale in sequentially (200ms stagger), each pulsing once as narration names it. Convergence animation: all four icons travel along curved bezier paths into a single glowing point over 1.5s, ease-in-cubic (accelerating, like gravity).

Background: Deep Navy Premium, consistent with Act 2.

Transitions: Hard cut in from Scene 6. The convergence point becomes the seed of Scene 8's "Financial Context" label — no hard cut, a continuous morph.

On-Screen Text: "Income" / "Expenses" / "Assets" / "Liabilities" (each appears beside its icon, then fades as convergence begins).

Emotional Goal: Clarity. Four simple, honest truths — nothing hidden, nothing invented.

Sound Effects: Four soft distinct chimes, one per icon appearing, rising in pitch (do-mi-sol-do arpeggio feel). A low whoosh as they converge.

Music Style: Theme continues, gently building — a light rhythmic layer (soft mallet percussion) enters, suggesting mechanism and precision.

SCENE 8

Duration: 2:00–2:15 (15s)

Narration:

"Together, they become your Financial Context — the single, always-current source of truth every other part of the system reads from."

Visual Description: The converged point of light from Scene 7 blooms outward into the label "Financial Context," rendered as a real, glowing architectural node — think of it visually like a hub in a systems diagram, not just text. Thin light-traces immediately begin extending outward from this node toward the edges of frame, previewing where they'll lead (Dashboard, Reports, Recommendations, AI) without yet resolving into full UI.

Camera Direction: Camera holds center, then begins a slow orbital drift (10-degree arc) around the Financial Context node, as if inspecting a physical object suspended in space.

Animation: Node bloom (400ms ease-out), followed by 4 light-traces extending outward at staggered timings (150ms apart), each trace terminating in a small, dim, not-yet-labeled endpoint.

Background: Deep Navy Premium, now with the beginning of a subtle particle-field depth layer (very faint, far background) suggesting a larger connected system.

Transitions: Continuous morph in from Scene 7 (no cut). Hard cut out to Scene 9 as one light-trace resolves into the Dashboard.

On-Screen Text: "Financial Context" (label appears beside the glowing node, understated weight, not shouting).

Emotional Goal: Trust. The feeling of a foundation being laid, deliberately and visibly, before anything is built on top of it.

Sound Effects: Sustained low resonant hum under the node, four soft "connection" ticks as each trace extends.

Music Style: Building steadily — strings layer in beneath the mallet percussion, still restrained, momentum gathering.

SCENE 9

Duration: 2:15–2:35 (20s)

Narration:

"That context becomes your Dashboard — a real-time picture of every goal you're working toward, and exactly how likely you are to reach it."

Visual Description: The first light-trace resolves into the actual Northstar Dashboard UI — a full-screen product capture: goal cards with live probability rings (e.g., "Retirement — 82% likely"), a net worth summary, an upcoming-milestones strip. This is real product UI, not a mockup — rendered at full production fidelity, Deep Navy Premium palette intact.

Camera Direction: Camera settles into a clean, slightly elevated 3/4 product-shot angle (as if the screen is a physical object tilted slightly toward camera), then a slow, subtle parallax drift across the dashboard's cards.

Animation: Dashboard cards populate in a staggered grid-reveal (100ms per card), probability rings animate from 0% to their final value over 1.2s each (ease-out), counting up visibly.

Background: The Dashboard UI itself, framed against a softly blurred

navy environment (subtle device-mockup bezel, minimal, modern).

Transitions: Hard cut in from Scene 8's resolving trace. Cross-dissolve out to Scene 10 (Dashboard scrolls/morphs into Reports).

On-Screen Text: "Dashboard" (small label, top-left corner, product-UI-consistent styling — not a big title card).

Emotional Goal: Confidence. Seeing your actual situation clearly, for the first time, without translation.

Sound Effects: Soft UI population sounds (subtle card-appear taps), a gentle rising tone as probability rings count up.

Music Style: Theme reaches a warm, confident plateau — full but not loud, strings and mallet percussion in balance.

SCENE 10

Duration: 2:35–2:50 (15s)

Narration:

"From the same context, Reports show you the full story behind every number — how you got here, and where the trend is actually heading."

Visual Description: Continuous camera move from the Dashboard into the Reports screen — line charts of net worth over time, a cash-flow breakdown, an asset-allocation donut chart, all populated with real chart components in the product's actual visual style.

Camera Direction: A single continuous dolly-left move, as if walking from one room of the product into the next — no hard cut, reinforcing "same system, same data."

Animation: Line charts draw on left-to-right (1.5s, ease-in-out), donut chart segments sweep in clockwise from 12 o'clock.

Background: Reports UI, same navy device-mockup framing as Scene 9 for visual continuity.

Transitions: Continuous dolly move in from Scene 9 (no cut). Hard cut out to Scene 11.

On-Screen Text: "Reports."

Emotional Goal: Understanding. Not just "what" but "why" and "so what happens next."

Sound Effects: Soft chart-draw whoosh, a subtle tick per data point plotted.

Music Style: Theme sustains at its confident plateau, a light countermelody introduced on a second instrument (soft synth pad) to signal "more depth revealed."

SCENE 11

Duration: 2:50–3:15 (25s)

Narration:

"And because the system already understands your full context, it doesn't just show you numbers — it tells you what to actually do about them. That's Recommendations. And when you want to ask instead of read, that's your AI Copilot — grounded entirely in your real data, never guessing."

Visual Description: Reports UI gives way to a Recommendations panel — clean cards, each with a clear action ("Increase SIP by ₹4,000/month to close your retirement gap," "You may qualify for Sukanya Samriddhi Yojana"). Then the frame shifts to the AI Copilot chat panel: a user types a question ("Can I retire at 55?"), and a calm, grounded response streams in, visibly referencing the actual goal data shown earlier in the film (a small inline citation chip linking back to the Dashboard's retirement goal card).

Camera Direction: Hard cut from Reports to Recommendations (a clean product transition, not continuous — signals "a new capability," not "a deeper view"). Then a slow push-in on the Copilot chat as the response streams, ending in a close, intimate framing of the citation chip.

Animation: Recommendation cards stagger-in (120ms apart). Copilot response text streams token-by-token at a natural reading pace (not instant), citation chip pulses once when it appears.

Background: Recommendations/Copilot UI, same device-mockup framing, maintaining visual continuity across the entire Act.

Transitions: Hard cut in from Scene 10. Hard cut out to Scene 12 (Act 4 title card — a deliberate full stop before the next act begins).

On-Screen Text: "Recommendations" → "AI Copilot" (label changes as the scene's focus shifts).

Emotional Goal: Empowerment. The system doesn't just inform — it partners, and it's honest about where its answers come from.

Sound Effects: Card-appear taps for recommendations; a soft, warm "thinking" tone before the Copilot response begins streaming; a distinct, satisfying click for the citation chip.

Music Style: Theme reaches its Act 3 emotional peak — full instrumentation, warm and resolved — then begins to taper as the scene closes, making room for Act 4's more kinetic energy.

ACT 4 — THE LIFE EVENT ENGINE

(3:15 – 4:30 · 75 seconds · 5 scenes)

SCENE 12

Duration: 3:15–3:25 (10s)

Narration:

"But life doesn't hold still. So neither does your plan."

Visual Description: Full navy frame, the Northstar mark small and centered, pulsing once. Clean typography beneath it fades in.

Camera Direction: Static, full-bleed title card — a deliberate breath between acts, the film's second-clearest "chapter break."

Animation: Mark pulse (600ms), text fade-up (500ms), hold, fade out.

Background: Deep Navy Premium, unadorned.

Transitions: Hard cut in from Scene 11. Hard cut out to Scene 13 (the act's kinetic montage begins immediately).

On-Screen Text: "LIFE DOESN'T HOLD STILL. NEITHER DOES YOUR PLAN."

Emotional Goal: Anticipation for motion — the calm before Act 4's energy.

Sound Effects: Single deep tonal hit, then near-silence.

Music Style: A tempo shift begins here — the score's rhythm section doubles in pace, subtly, under the silence, like a held breath before running.

SCENE 13

Duration: 3:25–3:50 (25s)

Narration:

"A salary raise. A marriage. A house. A new child. Paying off a loan early. Retirement itself. Seventeen real life events — and every single one updates your entire plan, live, the moment it happens."

Visual Description: A fast, rhythmic montage — six quick vignettes, roughly 3–4 seconds each, cut to the beat: (1) a payslip notification with a higher number, dashboard goal-probability ring visibly ticking upward; (2) two wedding rings on a table, a "Household" merge animation on the Family screen; (3) a house-key handoff, a new "Home Loan" liability card sliding into the liabilities list; (4) a small pair of baby shoes, a new "Education Fund" goal card appearing; (5) a "Loan Paid Off" stamp animation, the liabilities list shrinking by one row with a satisfying collapse; (6) a calendar flipping forward to a retirement-age milestone, the Dashboard's retirement goal ring settling at its final, confident value. Each vignette explicitly shows the Dashboard's numbers changing in direct response — the connective tissue of the whole montage.

Camera Direction: Fast, confident cuts — no vignette held longer than 4 seconds. Each vignette uses a slightly different camera treatment (handheld-feeling push, static product shot, top-down flat-lay, etc.) to keep the rapid montage visually varied rather than repetitive.

Animation: Each vignette's UI counterpart animates its specific change (a number ticking up, a card sliding in, a card collapsing out) at a snappy, satisfying pace (300–500ms per micro-animation) — this is the film's most kinetic sequence.

Background: Alternates between real-world vignette environments (warm, human, lived-in) and the navy product UI — the contrast is intentional: life happens in the world, the plan updates in the system.

Transitions: Hard, rhythmic cuts between all six vignettes (no dissolves — this section is about momentum). Hard cut out to Scene 14.

On-Screen Text: A single small label per vignette, appearing bottom-left for exactly the vignette's duration: "Salary Raise" / "Marriage" / "House Purchase" / "Birth of a Child" / "Loan Payoff" / "Retirement."

Emotional Goal: Momentum and delight. The specific pleasure of

watching a system keep up with you instead of the reverse.

Sound Effects: A distinct, satisfying "confirm" sound per vignette (six variations on one sonic motif, so they feel related but not identical) — payslip chime, ring-tap, key-jingle, soft coo, stamp-thud, clock-chime.

Music Style: The doubled-tempo rhythm section from Scene 12 is now fully audible — energetic but still melodic, never chaotic. Each vignette's sound effect lands precisely on a musical downbeat.

SCENE 14

Duration: 3:50–4:10 (20s)

Narration:

"Before anything changes for real, you can preview it. See exactly how a decision would ripple through your entire plan — with nothing committed yet."

Visual Description: A single, calmer scene after the montage's energy: the Dashboard shown with a "Preview" toggle being switched on. The screen splits cleanly into a Before / After comparison — left side labeled "Current," right side labeled "Preview: +₹15,000/month SIP" — every affected goal's probability ring visibly differs between the two sides, with a subtle connecting line between corresponding rings so the comparison reads instantly.

Camera Direction: Slow, deliberate push-in on the split-screen comparison — this scene is about precision and confidence, so the camera should feel calm and controlled after Scene 13's energy.

Animation: Split-screen wipe reveal (600ms), each "After" probability ring animates to its new value while its "Before" counterpart holds still, making the delta immediately legible.

Background: Dashboard UI, device-mockup framing, navy palette.

Transitions: Hard cut in from Scene 13 (deliberate tempo drop). Cross-dissolve out to Scene 15.

On-Screen Text: "Preview Engine" (small label, top-center, between the two halves).

Emotional Goal: Control. The relief of being able to look before you leap — with real numbers, not a guess.

Sound Effects: A clean mechanical "split" sound as the screen divides, soft ambient hum under the comparison.

Music Style: Tempo settles back down, a single sustained pad chord under light arpeggiated notes — precision, not urgency.

SCENE 15

Duration: 4:10–4:25 (15s)

Narration:

"And if you change your mind? Undo. Completely. Instantly. Every part of your plan, exactly as it was."

Visual Description: The Preview comparison from Scene 14 collapses back to a single, unified Dashboard view as an "Undo" action is triggered — a satisfying, clean animation where every affected card visibly reverts to its original state in a single synchronized motion, like a tide pulling back out.

Camera Direction: Static center frame, letting the synchronized revert animation be the entire visual event — no camera movement competing with it.

Animation: All affected UI elements animate back to their original values simultaneously (400ms, ease-in-out) — the synchrony itself is the point, communicating "nothing was left in an inconsistent state."

Background: Dashboard UI, navy palette, unchanged from Scene 14.

Transitions: Continuous morph in from Scene 14. Hard cut out to Scene 16.

On-Screen Text: "Undo Framework."

Emotional Goal: Safety. The confidence to experiment freely, knowing nothing is ever truly at risk.

Sound Effects: A soft "rewind" whoosh, ending in a clean, single confirming tone as everything settles back into place.

Music Style: A brief, gentle downward arpeggio mirrors the visual "settling back" motion, then resolves into a calm held chord.

SCENE 16

Duration: 4:25–4:30 (5s)

Narration:

"Every what-if, reversible. Every plan, always current."

Visual Description: Full navy frame, clean typography, no UI — a breath before Act 5.

Camera Direction: Static full-bleed title card.

Animation: Text fades up (400ms), holds, fades out.

Background: Deep Navy Premium.

Transitions: Hard cut in from Scene 15. Hard cut out to Scene 17.

On-Screen Text: "EVERY WHAT-IF, REVERSIBLE. EVERY PLAN, ALWAYS CURRENT."

Emotional Goal: A settled, confident close to the act.

Sound Effects: Single soft tonal hit.

Music Style: Brief pause in melodic movement — a sustained chord holds, setting up Act 5's more analytical, architectural tone.

ACT 5 — THE RECOMMENDATION ENGINE

(4:30 – 5:15 · 45 seconds · 2 scenes)

SCENE 17

Duration: 4:30–4:50 (20s)

Narration:

"Most systems compute an answer once, save it, and hope it doesn't go stale. Northstar doesn't. Every recommendation, every probability, every insight is computed live — the moment you ask for it, from your real, current data."

Visual Description: A clean, architectural split-screen diagram (motion-graphics style, not product UI): on the left, "The Old Way" — a database icon storing a "cached" recommendation, a small clock icon beside it ticking, a red warning glyph appearing as the cache visibly diverges from a live data icon beside it. On the right, "The Northstar Way" — a single live computation icon pulsing in sync with a data icon, always perfectly aligned, no cache, no clock, no warning.

Camera Direction: Static symmetrical split-screen framing — the composition itself is the argument, so keep the camera perfectly still and let the two sides visually contrast.

Animation: Left side: cache icon "ages" visually (desaturates slightly, clock hands spin) over the scene's duration, ending with the warning glyph pulsing. Right side: live computation icon and data icon pulse in perfect synchrony throughout, never diverging.

Background: Deep Navy Premium, split by a single thin vertical light-line down the center.

Transitions: Hard cut in from Scene 16. Cross-dissolve out to Scene 18.

On-Screen Text: "The Old Way" / "The Northstar Way" (small labels above each half).

Emotional Goal: Clarity and quiet technical confidence — this is the scene aimed most directly at engineers in the audience.

Sound Effects: Left side: a subtle dissonant, slightly detuned tone that grows more dissonant over time. Right side: a clean, perfectly in-tune sustained tone, unwavering.

Music Style: The score itself briefly mirrors the visual — a subtly out-of-tune motif on the left transition beat resolves into a perfectly in-tune version as focus shifts right.

SCENE 18

Duration: 4:50–5:15 (25s)

Narration:

"No duplicated logic. No two screens disagreeing. One engine, one source of truth, feeding your Dashboard, your Reports, your Recommendations, and your Copilot — all at once, all in sync."

Visual Description: A single glowing central node (visually echoing Scene 8's "Financial Context" node, deliberately — this is the same architectural honesty, now shown at the recommendation layer) with four

light-traces extending outward, each terminating in a small icon representing Dashboard, Reports, Recommendations, and AI Copilot. All four icons pulse in perfect, visible synchrony with the central node — the same visual "breathing" rhythm from Scene 1, now representing systemic harmony instead of anxious uncertainty.

Camera Direction: Slow 360-degree orbital drift around the central node and its four connected endpoints — a complete, confident reveal of the whole system's shape.

Animation: All five elements (node + 4 endpoints) pulse in unison (1.5s cycle), the light-traces have a subtle flowing particle animation traveling from center outward, reinforcing "live data flow," not static connection lines.

Background: Deep Navy Premium with the particle-field depth layer from Scene 8, now fully visible and active — visually completing that earlier setup.

Transitions: Cross-dissolve in from Scene 17. Hard cut out to Scene 19 (Act 6 begins — a tonal shift toward engineering credibility).

On-Screen Text: "One Engine. One Source of Truth."

Emotional Goal: Systemic confidence — the payoff of Act 1's anxiety about disagreeing numbers, now fully and visually resolved.

Sound Effects: A warm, resonant chord sustains under the pulsing synchrony, four soft confirming tones (one per endpoint) that all land in tune with each other.

Music Style: The theme reaches full harmonic resolution here — this is the film's emotional and architectural centerpiece, and the score should feel completely settled and confident.

ACT 6 — ENGINEERING

(5:15 – 6:15 · 60 seconds · 4 scenes)

SCENE 19

Duration: 5:15–5:30 (15s)

Narration:

"None of this is a demo. It's a real, production backend — FastAPI, PostgreSQL, SQLAlchemy — built the way serious financial systems have to be built."

Visual Description: A clean, elegant code-editor aesthetic (not a cluttered IDE screenshot — a designed, motion-graphics interpretation of code) showing a FastAPI route definition, then a SQLAlchemy model, then a terminal window running a database migration cleanly to completion (`alembic upgrade head` — a real, accurate command). Syntax highlighting uses the Northstar navy palette rather than a generic editor theme, tying the engineering visuals to the same brand world as the product UI.

Camera Direction: Slow horizontal pan across three "panels" (route → model → terminal), as if scrolling through a single continuous engineering canvas.

Animation: Code types on at a natural, readable pace (not instant-paste) — roughly 25 characters/second, terminal output appears line-by-line with realistic timing gaps.

Background: Deep charcoal-navy code-editor background, consistent with the product's overall palette.

Transitions: Hard cut in from Scene 18. Hard cut out to Scene 20.

On-Screen Text: "FastAPI" / "PostgreSQL" / "SQLAlchemy" (small labels, appearing beside each respective panel).

Emotional Goal: Technical credibility — this scene is for the engineers and CTOs in the audience specifically.

Sound Effects: Soft, satisfying mechanical keyboard-style typing sounds (subtle, not distracting), a clean terminal "success" tone as the migration completes.

Music Style: Tempo and energy lift slightly — a more driving, purposeful rhythm (think: focused build-montage energy), still melodic and controlled.

SCENE 20

Duration: 5:30–5:45 (15s)

Narration:

"A React frontend that feels instant, because the architecture underneath it is honest — no fake loading states standing in for real data."

Visual Description: Continuous scene from Scene 19's engineering canvas — now showing a React component tree diagram (clean, motion-graphics style node tree, not a raw screenshot) alongside a live product screen updating in real time as a component highlights in the tree. The connection between "this component" and "this exact pixel on screen" is made explicit and satisfying.

Camera Direction: Continuous pan (matching Scene 19's movement direction) into this new panel, maintaining the sense of one continuous engineering tour.

Animation: Component tree nodes highlight in sequence as their corresponding UI element on the live product screen simultaneously pulses — a clean, synchronized call-and-response animation.

Background: Same code-editor-adjacent aesthetic as Scene 19, with the live product screen inset cleanly beside it.

Transitions: Continuous pan in from Scene 19 (no hard cut). Hard cut out to Scene 21.

On-Screen Text: "React."

Emotional Goal: Craft. The specific respect engineers have for software that behaves the way its architecture promises it will.

Sound Effects: Soft synchronized "tick" sounds pairing each tree-node highlight with its UI counterpart's pulse.

Music Style: Continues the driving rhythm from Scene 19, unbroken.

SCENE 21

Duration: 5:45–6:00 (15s)

Narration:

"Six hundred and seventy-three backend tests. Every architectural decision recorded, not just made. This system is built to be trusted — and built to be understood."

Visual Description: A terminal window runs the real backend test suite to completion — a long, satisfying scroll of passing test names accelerating into a blur, ending on a clean summary line: "673 passed." This dissolves into a clean visualization of an Architecture Decision Record document — a real ADR entry (e.g., "ADR-001: Goal Probability Recalculation Trigger") shown as elegant, readable typography, not a screenshot.

Camera Direction: Static frame on the terminal, then a clean cross-dissolve push-in on the ADR typography — deliberate pacing shift from "speed" (tests) to "rigor" (documented reasoning).

Animation: Test output scrolls at increasing speed (accelerating from readable to blur over 2s), then hard-stops on the "673 passed" summary line with a satisfying settle. ADR text fades in cleanly, no distracting motion.

Background: Terminal dark background, then Deep Navy Premium for

the ADR panel.

Transitions: Hard cut in from Scene 20. Cross-dissolve out to Scene 22.

On-Screen Text: "673 Backend Tests" / "ADR-001: Goal Probability Recalculation Trigger."

Emotional Goal: Trust through rigor — the film's clearest statement that this system takes correctness seriously, not just aesthetics.

Sound Effects: Rapid, quiet test-pass ticks accelerating into a soft blur-hum, then a single solid confirming tone on "673 passed." Quiet page-turn-like sound as the ADR appears.

Music Style: Rhythm intensifies briefly during the test scroll (mirroring the acceleration), then settles into a calmer, more contemplative variation of the theme for the ADR beat.

SCENE 22

Duration: 6:00–6:15 (15s)

Narration:

"Every part of this system — documented, connected, and traceable. An engineering knowledge base built with the same discipline as the product itself."

Visual Description: A clean, elegant knowledge-graph visualization (motion graphics, node-and-edge diagram) showing canonical documentation nodes ("System Architecture," "API Reference," "Database Schema," "Testing Strategy") connected by traced edges to real code and test nodes — visually similar in style to Scene 18's "one source of truth" diagram, deliberately echoing it to tie engineering rigor back to product rigor.

Camera Direction: Slow pull-back reveal, starting close on a single

documentation node and widening to reveal the full connected graph — a "just how much is actually connected here" reveal.

Animation: Graph nodes and edges draw on progressively (staggered, 100ms per edge), the whole graph gently "breathes" once fully formed (matching the film's recurring pulse motif from Scenes 1, 8, and 18).

Background: Deep Navy Premium, particle-field depth layer fully present.

Transitions: Cross-dissolve in from Scene 21. Hard cut out to Scene 23 (Act 7's hard tonal break begins).

On-Screen Text: "Engineering Knowledge Base V2."

Emotional Goal: Completeness and confidence — the sense of a system that is not just built, but genuinely understood by the people who built it.

Sound Effects: Soft chime per edge drawn, building into a single warm chord as the full graph completes and breathes.

Music Style: The theme reaches a second, quieter resolution — confident but restrained, setting up the deliberate tonal break of Act 7.

ACT 7 — NORTHSTAR V2: FUTURE VISION

(6:15 – 7:00 · 45 seconds · 2 scenes) **Production Note:** this act must be visually unmistakable as unreleased vision work. Color grade, typography treatment, and framing all shift deliberately. Nothing here may be rendered as functioning product UI.

SCENE 23

Duration: 6:15–6:22 (7s)

Narration:

"Everything you've just seen — is real, and it's shipped. What comes next hasn't been built yet. This is where we're going."

Visual Description: A hard, deliberate visual break: the Deep Navy Premium palette used throughout the entire film desaturates and shifts to a cooler, sketch-like monochrome blueprint tone. The Northstar mark reappears, now rendered as a rough architectural sketch/blueprint line drawing rather than the finished brand mark used since Scene 5 — visually signaling "concept," not "product."

Camera Direction: Static, full-bleed frame — the palette shift itself is the entire visual event; no camera movement should distract from it.

Animation: A visible desaturation wipe transitions the full frame from navy-and-white to blueprint-monochrome over 1.5s. The mark redraws in a rougher, sketch-brush line style.

Background: Transitioning from Deep Navy Premium to a cool blueprint-gray.

Transitions: Hard cut in from Scene 22. The desaturation wipe itself serves as the transition into Scene 24.

On-Screen Text: "NORTHSTAR V2 — FUTURE VISION" (persistent watermark-style label, small, top-right corner, remaining visible through the rest of Act 7 to continuously reinforce that nothing shown from here is shipped).

Emotional Goal: A clear, honest reset — excitement about the future, without any risk of confusing it for the present.

Sound Effects: A single distinct tonal shift — the film's established chime motif now played through a subtle filter/reverb, signaling "same world, different register."

Music Style: The score shifts to a sparser, more exploratory variation of the main theme — same melodic DNA, deliberately more open and unresolved, evoking possibility rather than certainty.

SCENE 24

Duration: 6:22–7:00 (38s)

Narration:

"A local, private AI that never needs your data to leave your device. A knowledge graph connecting every fact about your financial life. Private retrieval-augmented reasoning, grounded entirely in your own records. A voice assistant you can simply talk to. An Advisor Mode, built for the professionals who guide their clients. Estate planning, built in from the start. And document intelligence — real files, real detail, real understanding. None of this exists yet. All of it is where Northstar is headed."

Visual Description: A sequence of seven rapid, clearly-labeled concept sketches (blueprint/wireframe visual style established in Scene 23 — line-art, unfinished, deliberately not polished product UI), each on screen for roughly 5 seconds: (1) a phone icon with a closed-lock glyph, no network lines leaving it — "Local AI"; (2) a sparse node-and-edge graph sketch — "Knowledge Graph"; (3) a document icon feeding into a sketch of a reasoning chain — "Private RAG"; (4) a simple soundwave glyph beside a sketched chat bubble — "Voice Assistant"; (5) a two-person icon (advisor + client) with a shared dashboard sketch — "Advisor Mode"; (6) a sketched family tree with a document/will icon — "Estate Planning"; (7) a scanned-document icon with a magnifying glass and extracted data points — "Document Intelligence." Every single concept sketch remains in the blueprint/wireframe style — never once do these resemble the finished product UI shown in Acts 3–6.

Camera Direction: A slow, continuous lateral drift across all seven concepts, as if panning across a designer's concept wall — unhurried, exploratory, matching the narration's measured pace.

Animation: Each concept sketch draws on in rough, hand-sketched line-animation style (distinct from the clean product-UI animations of earlier acts), holds briefly, then the camera drifts to the next.

Background: Blueprint-gray, consistent with Scene 23's palette shift, grid lines faintly visible (architectural-drawing aesthetic).

Transitions: Continuous lateral drift, no hard cuts between the seven concepts. Hard cut out to Scene 25.

On-Screen Text: Each concept's label appears beneath its sketch: "Local AI" / "Knowledge Graph" / "Private RAG" / "Voice Assistant" / "Advisor Mode" / "Estate Planning" / "Document Intelligence" — and the "NORTHSTAR V2 — FUTURE VISION" watermark persists in the top-right corner throughout, unbroken.

Emotional Goal: Inspired curiosity — excitement for what's ahead, held at an honest arm's length from what's already real.

Sound Effects: A soft, consistent "sketch" sound (pencil-on-paper texture, subtle) as each concept draws on — deliberately less polished than the product UI sound design in earlier acts, reinforcing "not yet built."

Music Style: The sparse, exploratory theme variation from Scene 23 continues and very gradually builds in warmth and instrumentation across the seven concepts — ending just short of full resolution, intentionally, to leave room for Act 8's true resolution.

ACT 8 — CLOSING

(7:00 – 7:30 · 30 seconds · 2 scenes)

SCENE 25

Duration: 7:00–7:15 (15s)

Narration:

"The future is still being built. But the foundation — is already here."

Visual Description: The blueprint-gray palette from Act 7 smoothly transitions back to the Deep Navy Premium palette used throughout Acts 2–6 — the "return home" moment. The Northstar mark, last seen as a rough sketch in Scene 23, redraws itself back into its finished, confident brand form.

Camera Direction: Slow push-in on the mark as it completes its return, mirroring Scene 5's original line-draw reveal — a deliberate visual callback closing the loop.

Animation: Palette cross-fades from blueprint-gray to Deep Navy Premium over 2s; the mark's sketch-lines smoothly interpolate back into clean single-weight brand linework (600ms).

Background: Transitioning from blueprint-gray back to Deep Navy Premium.

Transitions: Cross-dissolve in from Scene 24. Cross-dissolve out to Scene 26.

On-Screen Text: None — let the visual return do the work.

Emotional Goal: Resolution. The comfort of returning to solid, real ground after the exploratory openness of Act 7.

Sound Effects: The film's original tuning-fork tone from Scene 5 returns, exactly as it sounded then — a precise emotional callback.

Music Style: The main theme returns in full, resolving completely — the fullest, warmest statement of the melody in the entire film.

SCENE 26

Duration: 7:15–7:30 (15s)

Narration:

"Northstar. Plan for every stage of life."

Visual Description: Final full-bleed frame: the Northstar wordmark, centered, with the tagline beneath it. This is the film's calmest, most confident, least decorated frame — everything the film has built toward lands here, simply.

Camera Direction: Completely static, centered, symmetrical framing — no movement. The stillness itself is the final statement, echoing Scene 1's opening stillness but now resolved rather than anxious.

Animation: Wordmark and tagline are already in place from Scene 25's resolve; only a final, slow fade-to-black begins at 7:26, completing exactly at 7:30.

Background: Deep Navy Premium.

Transitions: Cross-dissolve in from Scene 25. Fade to black (final, 4s) — film ends.

On-Screen Text: "NORTHSTAR" / "Plan for every stage of life."

Emotional Goal: Quiet, earned confidence. Not a sales close — an invitation, stated once, plainly.

Sound Effects: The heartbeat pulse from Scene 1 returns one final time, now slow, steady, and calm, fading with the picture.

Music Style: Final resolved chord sustains and fades naturally with the picture — no final "sting," no button. The film ends the way it began: with a single, honest pulse.

CONSOLIDATED PRODUCTION MATERIALS

FULL VOICE-OVER SCRIPT (continuous read-through)

(0:00) Somewhere right now, someone is trying to answer a simple question. (0:12) "Am I actually going to be okay?" Not someday. Not in theory. Right now, with the money I actually have. (0:30) We built an entire financial industry — and somehow left the person in the middle of it holding twelve disconnected answers to one question. (0:50) Financial life was never meant to be a spreadsheet. (1:00) So we built one system instead. One place where every number about your life — agrees with every other number about your life. (1:20) This is Northstar. An AI-first financial planning platform, built on a single idea: your entire financial life should live in one honest, living system — not twelve disconnected guesses. (1:45) It starts with four honest inputs. What you earn. What you spend. What you own. What you owe. (2:00) Together, they become your Financial Context — the single, always-current source of truth every other part of the system reads from. (2:15) That context becomes your Dashboard — a real-time picture of every goal you're working toward, and exactly how likely you are to reach it. (2:35) From the same context, Reports show you the full story behind every number — how you got here, and where the trend is actually heading. (2:50) And because the system already understands your full context, it doesn't just show you numbers — it tells you what to actually do about them. That's Recommendations. And when you want to ask instead of read, that's your AI Copilot — grounded entirely in your real data, never guessing. (3:15) But life doesn't hold still. So neither does your plan. (3:25) A salary raise. A marriage. A house. A new child. Paying off a loan early. Retirement itself. Seventeen real life events — and every single one updates your entire plan, live, the moment it happens. (3:50) Before anything changes for real, you can preview it. See exactly how

a decision would ripple through your entire plan — with nothing committed yet. (4:10) And if you change your mind? Undo. Completely. Instantly. Every part of your plan, exactly as it was. (4:25) Every what-if, reversible. Every plan, always current. (4:30) Most systems compute an answer once, save it, and hope it doesn't go stale. Northstar doesn't. Every recommendation, every probability, every insight is computed live — the moment you ask for it, from your real, current data. (4:50) No duplicated logic. No two screens disagreeing. One engine, one source of truth, feeding your Dashboard, your Reports, your Recommendations, and your Copilot — all at once, all in sync. (5:15) None of this is a demo. It's a real, production backend — FastAPI, PostgreSQL, SQLAlchemy — built the way serious financial systems have to be built. (5:30) A React frontend that feels instant, because the architecture underneath it is honest — no fake loading states standing in for real data. (5:45) Six hundred and seventy-three backend tests. Every architectural decision recorded, not just made. This system is built to be trusted — and built to be understood. (6:00) Every part of this system — documented, connected, and traceable. An engineering knowledge base built with the same discipline as the product itself. (6:15) Everything you've just seen — is real, and it's shipped. What comes next hasn't been built yet. This is where we're going. (6:22) A local, private AI that never needs your data to leave your device. A knowledge graph connecting every fact about your financial life. Private retrieval-augmented reasoning, grounded entirely in your own records. A voice assistant you can simply talk to. An Advisor Mode, built for the professionals who guide their clients. Estate planning, built in from the start. And document intelligence — real files, real detail, real understanding. None of this exists yet. All of it is where Northstar is headed. (7:00) The future is still being built. But the foundation — is already here. (7:15) Northstar. Plan for every stage of life.

VO word count: ~610 words. **Recommended read pace:** measured, unhurried — roughly 85–95 words/minute, well below conversational pace, consistent with the "calm, confident, never salesy" voice style. This pace comfortably fills 450 seconds with room for the silences specified in Scenes 1, 4, 12, and 16.

SHOT LIST (production-numbered)

Shot	Scene	Type	Subject
001	S1	CU, static	Single pulsing light point on black
002	S2	Push-in	Cluttered desktop, conflicting numbers
003	S3	Top-down flat-lay	Physical desk, hesitating hand
004	S4	Full-bleed title	Thesis statement typography
005	S5	CU, slow push-in	Northstar mark line-draw reveal
006	S6	Static, centered	Wordmark + tagline lockup
007	S7	Wide → push-in	Four Financial Context inputs converging
008	S8	Slow orbital	Financial Context node + outward traces
009	S9	3/4 product angle	Dashboard UI, goal probability rings
010	S10	Continuous dolly-left	Reports UI, charts drawing on
011	S11	Hard cut → push-in	Recommendations cards → AI Copilot chat
012	S12	Static title	Act 4 chapter break
013	S13	6x fast cuts	Life event montage (6 vignettes)
014	S14	Slow push-in	Preview Engine before/after split
015	S15	Static center	Undo Framework synchronized revert
016	S16	Static title	Act 4 closing statement
017	S17	Static symmetrical	Old Way vs Northstar Way diagram

018	S18	360 orbital	Single source of truth node diagram
019	S19	Horizontal pan	Backend code: FastAPI/SQLAlchemy/terminal
020	S20	Continuous pan	React component tree + live UI sync
021	S21	Static → push-in	Test suite run (673 passed) → ADR doc
022	S22	Pull-back reveal	Engineering Knowledge Base graph
023	S23	Static, palette wipe	Blueprint desaturation transition
024	S24	Slow lateral drift	7 future-vision concept sketches
025	S25	Slow push-in	Mark redraws back to finished brand form
026	S26	Static, symmetrical	Final wordmark + tagline, fade to black

SCENE TIMING TABLE

Scene	Start	End	Duration	Act
1	0:00	0:12	12s	1
2	0:12	0:30	18s	1
3	0:30	0:50	20s	1
4	0:50	1:00	10s	1
5	1:00	1:20	20s	2
6	1:20	1:45	25s	2
7	1:45	2:00	15s	3

8	2:00	2:15	15s	3
9	2:15	2:35	20s	3
10	2:35	2:50	15s	3
11	2:50	3:15	25s	3
12	3:15	3:25	10s	4
13	3:25	3:50	25s	4
14	3:50	4:10	20s	4
15	4:10	4:25	15s	4
16	4:25	4:30	5s	4
17	4:30	4:50	20s	5
18	4:50	5:15	25s	5
19	5:15	5:30	15s	6
20	5:30	5:45	15s	6
21	5:45	6:00	15s	6
22	6:00	6:15	15s	6
23	6:15	6:22	7s	7
24	6:22	7:00	38s	7
25	7:00	7:15	15s	8
26	7:15	7:30	15s	8

Total runtime: 7:30 (450 seconds) — within the requested 6–8 minute range.

ANIMATION NOTES (global)

- **Recurring pulse motif:** the single "breathing" light pulse introduced in Scene 1 recurs deliberately in Scenes 8, 18, 22, and

26 — each recurrence should use the identical pulse timing (2-second breathing cycle) so an attentive viewer recognizes it as the film's visual heartbeat, resolving from anxious (S1) to systemic (S8, S18) to complete (S26).

- **Two distinct animation languages:** Acts 1–6 use clean, precise, product-consistent motion design (ease-in-out-cubic curves, confident snaps, no overshoot/bounce). Act 7 deliberately switches to a rougher, hand-sketched animation language (visible line-draw imperfection, pencil-texture reveals) — this distinction is load-bearing for the "shipped vs. vision" separation and must not be softened in execution.
- **Product UI must be real:** every UI capture (Scenes 9, 10, 11, 13, 14, 15, 20) should be sourced from or faithfully match actual Northstar product screens — Deep Navy Premium palette, real component styling — not generic dashboard stock templates.
- **Counting/ticking animations** (probability rings, test-pass counters) should always ease-out (fast start, slow settle) — this reads as "confident arrival at a real number," not "random number generator."

MUSIC SUGGESTIONS

A single continuous score (not stock-music stitching), structured in five movements matching the emotional arc:

1. **Movement I — Tension (Act 1):** sparse solo piano, unresolved minor intervals, near-silence between phrases. Reference feel: minimalist, anxious restraint (in the sonic territory of Nils Frahm's quieter solo-piano work).
2. **Movement II — Arrival (Act 2–3):** the tension resolves into a warm major-key theme, piano and strings, joined gradually by soft mallet percussion — steady, confident, unhurried build. Reference feel: the calm-confidence register of Ólafur Arnalds' more orchestral pieces.
3. **Movement III — Momentum (Act 4):** tempo doubles, rhythm section becomes prominent, melody remains legible throughout — energetic without becoming chaotic. Reference feel: a controlled, melodic build-montage cue, not a generic "epic trailer" hit.

4. **Movement IV — Precision (Act 5–6):** returns to a controlled tempo, introduces a more mechanical/precise rhythmic layer under the same melodic theme — communicates engineering rigor without losing warmth.
5. **Movement V — Openness → Resolution (Act 7–8):** theme fragments into a sparser, more exploratory variation for Act 7 (intentionally unresolved), then returns in full, complete resolution for Act 8's closing statement — the fullest, warmest statement of the main theme in the entire film.

Tempo arc: ~62 BPM (Act 1) → ~78 BPM (Act 2–3) → ~118 BPM (Act 4) → ~92 BPM (Act 5–6) → ~70 BPM (Act 7) → ~80 BPM, full resolution (Act 8).

CAMERA DIRECTION GLOSSARY (as used throughout)

- **Static/locked-off:** camera does not move; used for title cards and moments requiring stillness (Scenes 1, 4, 12, 15, 16, 26).
- **Push-in:** slow forward camera movement toward the subject, building intimacy/focus (Scenes 5, 9-adjacent framing, 14, 21, 25).
- **Pull-back reveal:** camera moves backward from a tight subject to reveal scale/context (Scene 22).
- **Orbital drift:** camera arcs around a central subject at a shallow angle, suggesting inspection/completeness (Scenes 8, 18).
- **Continuous dolly/pan:** camera moves laterally without cutting, reinforcing "one continuous system" (Scenes 10, 19→20, 24).
- **Hard cut montage:** rapid, rhythmic cuts with no camera movement within each shot, used for kinetic energy (Scene 13).

VISUAL EFFECTS LIST

1. Line-draw logo reveal (Scene 5, mirrored in reverse in Scene 25).
2. Particle-field depth background layer (introduced Scene 8, recurs Scenes 18, 22).

3. Bezier-path convergence animation (Scene 7).
4. Split-screen before/after comparison wipe (Scene 14).
5. Synchronized multi-element revert animation (Scene 15).
6. Full-frame desaturation/palette wipe, navy ↔ blueprint-gray (Scenes 23, 25).
7. Hand-sketched line-draw animation style, distinct from clean product motion (Scene 24).
8. Token-by-token text streaming (Scene 11, AI Copilot response).
9. Accelerating scroll-to-blur text effect (Scene 21, test suite run).
10. Node-and-edge graph draw-on animation (Scenes 18, 22).

TRANSITION LIST (in order of appearance)

Hard cut (film open) → Cross-dissolve → Hard cut → Fade to black → Fade in from black → Hard cut → Cross-dissolve → Hard cut → Continuous morph (no cut) → Hard cut → Continuous dolly (no cut) → Hard cut → Hard cut → Cross-dissolve → Continuous morph (no cut) → Hard cut → Hard cut → Cross-dissolve → Cross-dissolve → Hard cut → Continuous pan (no cut) → Hard cut → Cross-dissolve → Cross-dissolve → Hard cut (desaturation wipe) → Continuous drift (no cut) → Hard cut → Cross-dissolve → Cross-dissolve → Fade to black (film close).

Rule of use: hard cuts mark act/topic changes and kinetic energy; cross-dissolves mark continuity within a topic; continuous morphs/pans/orbits are reserved for moments explicitly demonstrating "this is one connected system" (never used arbitrarily).

SUBTITLE SCRIPT (SRT-style)

1

00:00:00,000 --> 00:00:12,000

Somewhere right now, someone is trying to answer a simple

2

00:00:12,000 --> 00:00:30,000

Right now, with the money I actually have.

3

00:00:30,000 --> 00:00:50,000

We built an entire financial industry – and somehow left
in the middle of it holding twelve disconnected answers t

4

00:00:50,000 --> 00:01:00,000

Financial life was never meant to be a spreadsheet.

5

00:01:00,000 --> 00:01:20,000

So we built one system instead. One place where every num
your life – agrees with every other number about your lif

6

00:01:20,000 --> 00:01:45,000

This is Northstar. An AI-first financial planning platfor
a single idea: your entire financial life should live in
living system – not twelve disconnected guesses.

7

00:01:45,000 --> 00:02:00,000

It starts with four honest inputs. What you earn. What yo
What you own. What you owe.

8

00:02:00,000 --> 00:02:15,000

Together, they become your Financial Context – the single
always-current source of truth every other part of the sy

9

00:02:15,000 --> 00:02:35,000

That context becomes your Dashboard – a real-time picture
goal you're working toward, and exactly how likely you ar

10

00:02:35,000 --> 00:02:50,000

From the same context, Reports show you the full story behind the number – how you got here, and where the trend is actually

11

00:02:50,000 --> 00:03:15,000

That's Recommendations. And when you want to ask instead what's your AI Copilot – grounded entirely in your real data

12

00:03:15,000 --> 00:03:25,000

But life doesn't hold still. So neither does your plan.

13

00:03:25,000 --> 00:03:50,000

A salary raise. A marriage. A house. A new child. Paying taxes early. Retirement itself. Seventeen real life events – and a single one updates your entire plan, live, the moment it

14

00:03:50,000 --> 00:04:10,000

Before anything changes for real, you can preview it. See how a decision would ripple through your entire plan.

15

00:04:10,000 --> 00:04:25,000

And if you change your mind? Undo. Completely. Instantly. Every part of your plan, exactly as it was.

16

00:04:25,000 --> 00:04:30,000

Every what-if, reversible. Every plan, always current.

17

00:04:30,000 --> 00:04:50,000

Every recommendation, every probability, every insight is live – the moment you ask for it, from your real, current

18

00:04:50,000 --> 00:05:15,000

No duplicated logic. No two screens disagreeing. One engine, one source of truth – all at once, all in sync.

19

00:05:15,000 --> 00:05:30,000

It's a real, production backend – FastAPI, PostgreSQL, SQ built the way serious financial systems have to be built.

20

00:05:30,000 --> 00:05:45,000

A React frontend that feels instant, because the architecture underneath it is honest.

21

00:05:45,000 --> 00:06:00,000

Six hundred and seventy-three backend tests. This system to be trusted – and built to be understood.

22

00:06:00,000 --> 00:06:15,000

Every part of this system – documented, connected, and tr

23

00:06:15,000 --> 00:06:22,000

Everything you've just seen – is real, and it's shipped. What comes next hasn't been built yet.

24

00:06:22,000 --> 00:07:00,000

A local, private AI. A knowledge graph. Private retrieval reasoning. A voice assistant. An Advisor Mode. Estate planning. Document intelligence. None of this exists yet.

25

00:07:00,000 --> 00:07:15,000

The future is still being built. But the foundation – is

26

00:07:15,000 --> 00:07:30,000

Northstar. Plan for every stage of life.

FINAL RUNTIME

7 minutes 30 seconds (450 seconds) — 8 acts, 26 scenes.

ACCURACY NOTE (production disclosure, not for public cut)

One correction made against the original feature brief during screenplay development: **LangGraph is listed in the brief's project context, but it is not present in the current codebase** — the AI Copilot (`backend/app/routers/copilot.py`) calls the OpenAI SDK directly (`AsyncOpenAI`), with no LangGraph dependency found anywhere in `backend/` or `code/`. Per the brief's own strongest instruction — *"the video must accurately represent implemented functionality"* and *"never present future ideas as implemented"* — this screenplay places LangGraph-style orchestration nowhere in Acts 1–6, and it does not appear standalone in Act 7 either (Act 7's "Private RAG" concept is the closest honest placeholder for where a future orchestration layer would eventually live, per `docs/07_AI/AIArchitecture.md` §6–9's already-designed Tool Calling/RAG scaffolding). All other elements in the original project context list (Dashboard, Financial Context Engine, Recommendation Engine V2, Family Planning, Government Schemes, Monte Carlo Planning, Reports, Financial Profile, Life Event Engine, 17 Life Events, Undo Framework, Preview Engine, Transaction Consistency, AI Copilot, REST API, React, FastAPI, PostgreSQL, SQLAlchemy, 673 Backend Tests, Engineering Knowledge Base V2, ADR Architecture) were verified present in the codebase before being written into the screenplay as shipped functionality.
